PORT OF HELSINKI

2027

Additional information and application guidelines concerning other waste management fee discounts

5% discount on the waste management fee for short sea shipping vessels

The discount on the waste management fee for short sea shipping vessels is based on the vessel providing proof that they discharged their type of waste subject to the waste management fee at any port within the last 48 hours.

5% discount on the waste management fee for especially environmentally friendly on-board waste management

The discount is based on equipment or methods used on the vessel due to which the amount of waste discharged at port is lower than usual or the waste can be utilised.

The requirements for the discount are:

either:

1. Waste is sorted on board and its discharge to port reception facilities is carried out in a way that ensures that the different types of waste remain separate until they are reused, recycled, utilised and/or disposed of.

or:

2. The use of packing materials, such as individual packaging, is reduced and the use of single-use plastics is avoided.

To qualify for the discount, the vessel must present one of the following environmental certificates:

Green Award, ISO 21070, Blue Angel or Green Marine.
